	Set Forest Functional Level Select the forest functional level.	
	Forest functional level: Windows Server 2003 Detais: This forest functional level does not provide any new features over the Windows 2003 forest functional level. However, it ensures that any new domains created in this forest will automatically populate at the Windows Server 2008 domain functional level, which does provide unique features.	
	You will be able to add only domain controllers that are running Windows Server 2008 or later to this forest. More about <u>domain and forest functional levels</u>
